

Tree Activity

Use this activity sheet to help identify a Health Outcome that could be addressed in your community. Then use the data in County Health Rankings and Roadmaps website, <http://www.countyhealthrankings.org/>, to begin researching some Health Factors that could be contributing to the Health Outcomes.

Issue – What is the health issue you feel should be addressed in your community?

Root Causes – Health Factors that might lead to the issue.

Fruit Grown from Root Causes
- Health Outcomes such as quality of life and length of life. What do they look like in our community? There only 5 measures are looked at in the county health rankings, but feel free to think broader than just those 5 to identify what is happening in your community.

**Also look at some things that are positive, and ask why they are positive. i.e. was there a policy change, system change, civic engagement around issues....like a Parent/Teacher/Student Organization pushing to have healthier lunch options, or vending machines options.

Community Name: EXAMPLE

HEALTH OUTCOMES

Circle some Outcome that is high for the community

- Premature Deaths
- Poor or Fair Health
- Low Birth Weights
- Poor Physical Health Days
- Poor Mental Health Days

Issue:

Premature Deaths due to food related issues

HEALTH FACTORS

Circle some Factors that may contribute to the health issues in your community

- Smoking
- Physical Inactivity
- Alcohol Impaired driving deaths
- Uninsured
- Mental Health Providers
